

... you can replace the default template for creating projects with a customized template containing your default projects, libraries, reports, etc.

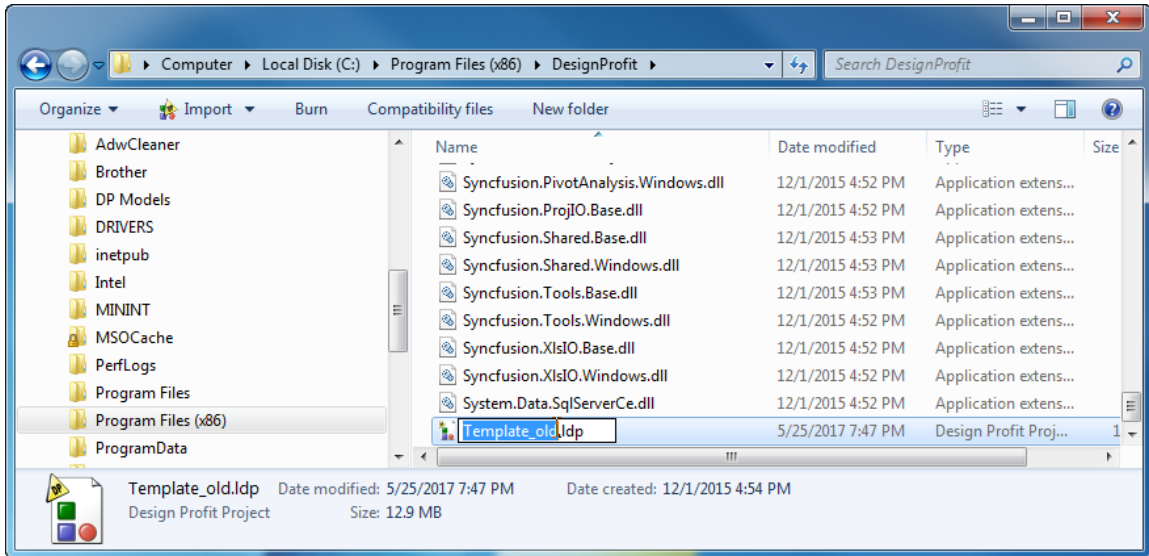

How to Set the Project Template

Important: You must have Windows User Account Control (UAC) Settings disabled to perform this action (See your Windows settings.)

1. Download the project template file you wish to use and place it in a convenient location such as the Desktop.
2. Rename the file to: **Template.ldp**
3. Using Windows Explorer, open the Design Profit program folder:
C:\Program Files (x86)\DesignProfit

4. Locate the current template file: **Template.ldp**.
Rename it: **Template_old.ldp**.

5. Copy the new template into **C:\Program Files (x86)\DesignProfit**.

The project template has been updated. The next time you open Design Profit and create a new project, the new project template will be used:
