

... Design Profit® provides bookmarks that let you “jump” to various symbols inside of a large diagram.

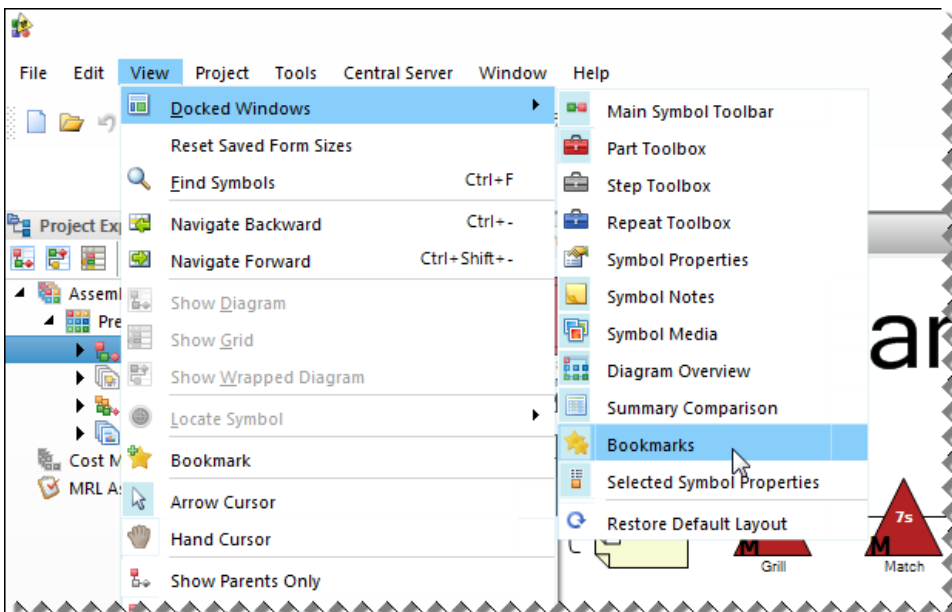

Bookmarks

If you have a large diagram and need to revisit certain symbols often, bookmarks are the way to go!

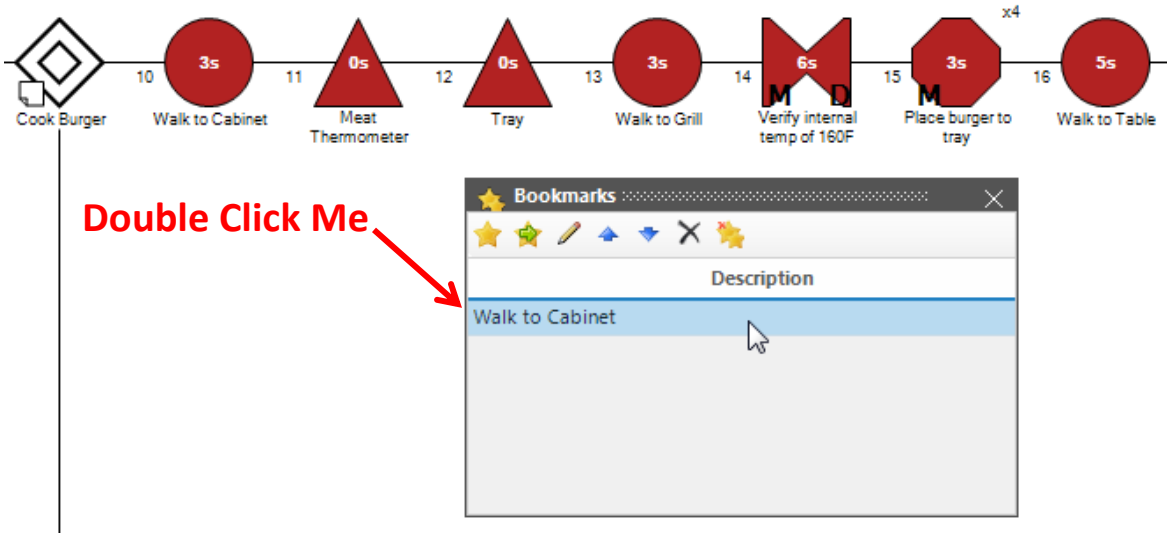

1. Right-click your favorite symbols to bookmark them (or use CTRL + B).

2. Make sure you have the **Bookmarks** docked window visible!

3. With the bookmark window open, just double-click any symbol to instantly jump straight to it!

It works in Redesigns, too!

Try bookmarking the last symbol you work on for the day. When you come back the next day, just double-click to return to your work position!
